

# Aussie Canvas Baby Gaol

Aussie Canvas baby gaols are proudly produced to the highest quality.

They are made from heavy duty mesh, YKK zips and Kedar on all four sides.

Kedar is designed to slide into sail/rope track. Which is then screwed to the inside edges of the bunk, so as not to be seen from the outside.

Because our system requires four solid sides to attach to, they are not suitable for some top bunks of pop-up caravans.

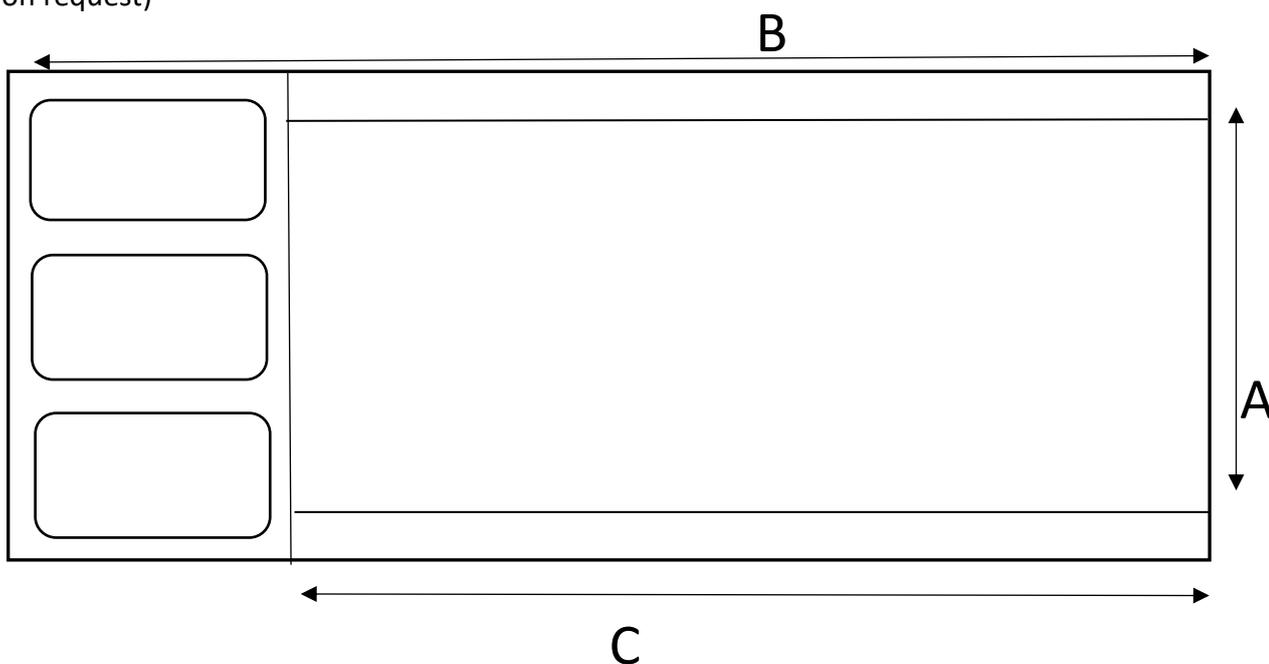

## **To measure for your Baby Gaol. You need to provide three things.**

1: (A) The height of the gap you need to fill.

2:(B) The width of the gap. If there are built-in stairs, and you wish to mesh in behind the stairs. We need the measurement from the furthest pillar of the stairs to where the gap finishes on the other side.

2:(C) If you don't want to go behind the stairs, we just need the width of the gap.

3: Whether you would like the 800mm door positioned left, right or centre. (We can do custom size doors on request)

**D - Mesh is available in Black or White.** Let us know which colour you would like.

NOTE: Please let us know if the measurements go from flat Surface to Flat surface as we need make adjustments

## **COSTS:**

Mesh width less than 1000mm	\$170
Mesh width 1000 - 1400mm	\$190
